

STRAUSS

Hospital Enterprise Solution

Hospital Management Information System (HMIS)

Enterprise Grade Solution

Utilize technology that adapts to you. Streamline all the processes and activities and increase productivity. Whether it's a clinic, multi-specialty or 100+ bedded hospital, get a fully scalable solution tailored to your requirements.

- Unlimited users
- Multiple location support

Automated Follow up Care

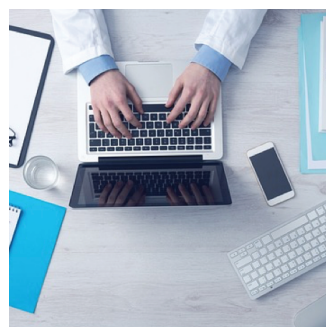

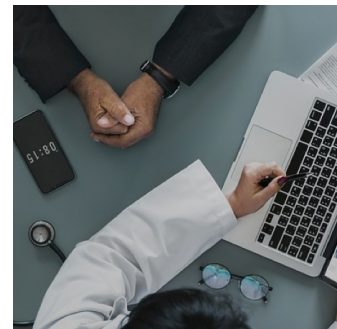

Revolutionize the way your doctors connect with the patients through a world class follow-up care experience. Engage and educate patients by sending personalized messages, periodically. Provide consultations anytime, anywhere and on any device.

- SMS care
- IVR calling

Personalized dashboards

Take better decisions to grow your practice with personalized dashboard that provides most important data in the form of actionable insights. Navigate easily and save time with personalized and relevant dashboard with respect to predefined user role.

- Doctor dashboard
- Staff dashboard

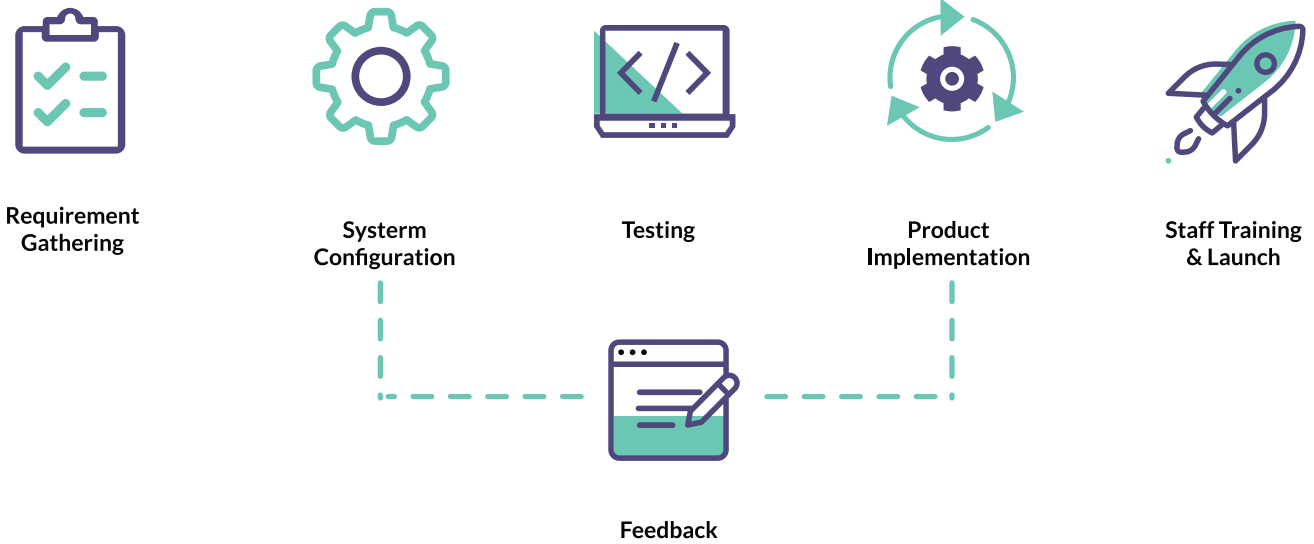

Data security

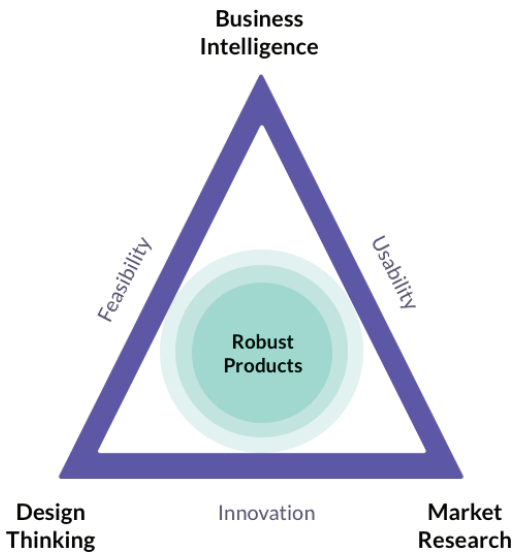

Optimize your HMIS experience with on-premise server hosting or cloud-based solution. Maintain an on-site database or on a secure cloud storage and get full access, privacy and control over the data. Your privacy is our priority, we never access or misuse your data.

- On premise server hosting
- Full data control and access

Implementation process

About Us

We are an innovative and process driven healthcare technology company with specialization in healthcare management solutions. We believe that digital transformation in healthcare industry is indispensable to improve healthcare outcomes, deliver superior patient experiences, engage stakeholders, increase workforce productivity and grow revenues. Doctors and hospitals rely on Strauss' powerful and customizable solution for its unparalleled user experience that not only saves time and maintains privacy but also increases brand value and revenues over time. We enable providers, clinics and hospitals to digitally transform how patients interact with the healthcare system by helping them manage and monitor their health, leading to better outcomes and lower costs. We partner to navigate the complexities of today's changing healthcare technology landscape so doctors and hospitals can focus more on providing patient care.
